

Equipment description - **STAR** design

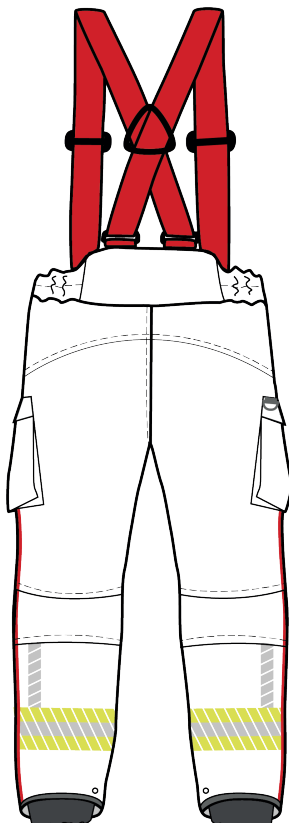

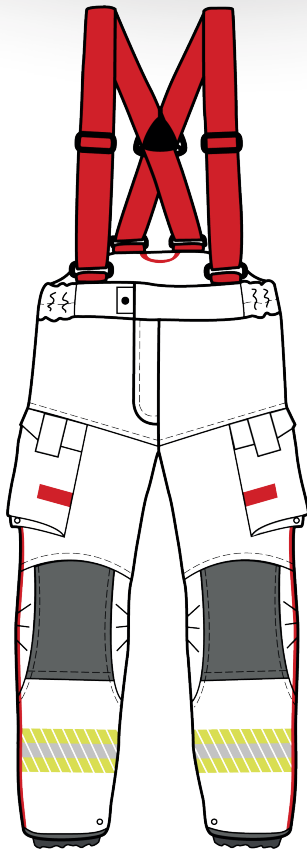

- modern and sporty design for GoodPRO structural (EN 469) firefighter suits
- allows maximum ease of movement while maintaining maximum protection
- significantly extended equipment of technical and functional accessories
- segmented reflective stripes for optimized visibility and comfort

STAR jacket

- shoulders, elbows and sleeve hems reinforced with silicon-carbon coated Kevlar[®]
- quality metal YKK[®] panic zipper with bottom holder flap for easy grip and fastening
- large inspection opening with zipper covered by flap
- thermally fixed segmented reflective stripes, 7,5cm wide yellow-silver-yellow, two in circumference of the body and two around each sleeve
- additional vertical 2,5 cm silver segmented reflective stripes on the sides of sleeves and body for better visibility in any direction
- one radio pocket on the left chest, one right chest pocket with Velcro band for the name tag fixed on the pocket flap, 2 slightly angled lower inner pockets, Napoleon pocket with zipper and 1 large inner left pocket with Velcro clothing
- external pockets equipped with Velcro flaps and practical holders made of reflective tape for better grip
- flashlight holder with Velcro regulation on the main zipper flap
- 4 textile loops on the chest and one red multi-purpose loop on the central zipper flap
- 2 large textile “tool” loops on lower sides of the jacket
- 4 metal D-rings, on the central zipper flap, under the radio pocket, in the right lower pocket, one the right bottom edge of the jacket
- sleeves ended with Nomex[®] knitted cuffs with a thumb hole
- ergonomically shaped ends of sleeves
- massively ergonomically pre-shaped elbows
- extended back of the jacket for safe overlap between the jacket & trousers
- collar with double security closing – by press studs and Velcro
- collar in one piece with central zipper flap, therefore providing ultimate neck protection without any gap
- durable anti-wicking barrier in the bottom edge of the jacket, inside the zipper flap and inside the ends of sleeves
- sleeves and bottom of the jacket equipped with drain holes
- main upper horizontal seam of the jacket highlighted by a red paspoil
- the most overloaded seams secured with red power stitching
- large red hanging loop inside collar

STAR trousers

- extra strong silicone-carbon coated Kevlar® reinforcements of knees with possibility to insert external knee pads for ultimate knee protection (130 x 200 mm)
- 5 cm wide removable braces
- elastic waist for better comfort
- thermally fixed segmented reflective stripes, 7,5cm wide yellow-silver-yellow, one in circumference of each trouser
- additional vertical 2,5 cm silver segmented reflective stripes on the sides for better visibility in any direction
- 2 angled cargo pockets with Velcro flaps and practical holders made of reflective tape for better grip
- 2 elastic inner loops, one inside each cargo pocket for effective fixation of any tool inside the pocket
- hems of the trousers ergonomically shaped and reinforced with silicone-carbon coated Kevlar®
- elastic cuffs inside ends of the trousers for protection against dirt and heat
- raised back waist of the trousers for safe overlap between the jacket & trousers
- ergonomically pre-shaped knees
- durable anti-wicking barrier at the end of trousers, equipped with double drain holes
- Velcro fly, fixed by press stud
- 1 metal D-ring in the right cargo pocket
- 2 large textile loops, one on each cargo pocket
- main vertical seams on the trousers highlighted by a red paspoil
- the most overloaded seams secured with red power stitching

OPTIONAL

- RFID
- integrated security belt
- DRD device

NOTICE:

It is possible to make slight variations and customized designs of the STAR design but it may create extra costs.
